

September 2011 = 87.6  
 1990 - YTD avg. = 97.2  
 1990 - 2007 avg. = 98.4  
 2008 - 2010 avg. = 92.3  
 2011 - YTD avg. = 89.9

\* Based on Clark County's employment-to-workforce ratio (Nevada Department of Employment, Training and Rehabilitation). Indexed to a baseline of 100 in Dec. 1998.

RCG's October **Clark County** (Nevada) **Job Index** of 89.5 shows a slight improvement over September, but only because the labor force is shrinking, not because we are seeing robust job growth. Some folks have either given up looking for work so they are not counted in the labor force, or they have left the market for greener pastures. Visit [www.rcg1.com](http://www.rcg1.com) or call John Restrepo at 702-967-3188 ext. 401 to learn more about our services.
